Education

VIT Bhopal University	2023 – 2027
B.Tech in Computer Science Engineering (AI/ML)	CGPA: 8.55
NxtWave Disruptive Technologies	2023 – Present
Industry Ready Certification in Full Stack Development	

Technical Skills

Languages: Python, JavaScript
Generative AI: LLMs, Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents
AI Frameworks: LangChain, OpenAI API, HuggingFace, Vector Databases (FAISS, ChromaDB)
Machine Learning: Scikit-learn, Pandas, NumPy, NLP, Deep Learning, LSTM
Backend: FastAPI, Node.js, Express.js, REST APIs
Frontend: React.js, HTML, CSS, Tailwind CSS
Databases: MongoDB, SQLite, Vector Databases
Tools: Git, GitHub, Docker, Postman

Projects

RAG PDF Chatbot using LLMs	 GitHub
- Built Retrieval-Augmented Generation (RAG) chatbot to answer questions from PDF documents. - Generated embeddings using transformer models and stored in vector database (FAISS/ChromaDB). - Integrated LLM API for contextual question answering. - Implemented semantic search and prompt engineering for accurate responses. - Designed modular AI pipeline for document ingestion and retrieval.	
AI Research Agent using LangChain (Agentic AI)	 GitHub
- Developed multi-step AI agent capable of reasoning and tool usage. - Implemented agent workflows using LangChain agents and tools. - Integrated APIs for search, summarization, and response generation. - Built autonomous pipeline for research and report generation. - Optimized prompts and agent decision-making logic.	
Sentiment Analysis using LSTM and Naive Bayes	 GitHub
- Developed sentiment classification system using ML and deep learning. - Implemented LSTM and Naive Bayes for NLP prediction. - Used GloVe embeddings for feature extraction. - Evaluated model performance on multiple datasets.	
CampusEats – Full Stack MERN Platform	 GitHub
- Developed role-based campus food ordering platform. - Built REST APIs using Node.js and Express. - Implemented authentication and scalable backend architecture. - Built responsive UI using React and Tailwind.	

Achievements

- Built AI applications using RAG, LLMs, and Agentic workflows.
- Solved 200+ programming problems across coding platforms.
- Developed full-stack and AI-based applications.

Interests

Generative AI, Agentic AI, RAG Systems, LLM Applications, AI Automation
