Profile

AI/ML undergraduate specializing in Generative AI, Large Language Models (LLMs), and Retrieval-Augmented Generation (RAG). Experienced in building AI chatbots, agent-based workflows, and NLP systems using Python, LangChain, and modern AI frameworks. Passionate about developing scalable AI-powered SaaS applications and automation solutions.

Education

VIT Bhopal University	2023 – 2027
B.Tech in Computer Science Engineering (AI/ML)	CGPA: 8.55
NxtWave Disruptive Technologies	2023 – Present
Industry Ready Certification in Full Stack Development	

Technical Skills

Languages: Python, JavaScript

Generative AI: LLMs, Prompt Engineering, RAG, AI Agents, Chatbots

Frameworks: LangChain, OpenAI API, HuggingFace, FAISS, ChromaDB

AI/ML: NLP, Deep Learning, LSTM, Scikit-learn, Pandas, NumPy

Backend: FastAPI, Node.js, REST APIs

Frontend: React.js, HTML, CSS, Tailwind CSS

Tools: Git, GitHub, Docker, Postman

Projects

AI RAG Chatbot for Document Question Answering	 GitHub
- Built Retrieval-Augmented Generation chatbot for document-based question answering - Implemented embeddings and vector search using FAISS / ChromaDB - Integrated LLM API for contextual responses - Designed semantic retrieval and prompt engineering pipeline - Developed modular AI workflow for knowledge-based QA	
AI Multi-Step Research Agent using LangChain	 GitHub
- Developed agent-based AI system using LangChain tools - Implemented multi-step reasoning and tool calling - Integrated APIs for search, summarization, and response generation - Built automated research and report generation pipeline - Optimized prompts and agent decision workflow	
Sentiment Analysis using LSTM and Naive Bayes	 GitHub
- Built NLP sentiment classification using LSTM and ML models - Used GloVe embeddings for feature representation - Evaluated performance on multiple datasets	
CampusEats – Full Stack MERN Platform	 GitHub
- Developed role-based campus food ordering platform - Built REST APIs and scalable backend architecture - Implemented authentication and responsive UI	

Achievements

- Built Generative AI applications using RAG and LLM-based workflows
- Solved 200+ programming problems across coding platforms
- Developed AI and full-stack applications
- Strong communication and problem-solving skills

Interests

Generative AI • Agentic AI • LLM Applications • RAG Systems • AI Automation
